To Create Transformational, Humanistic, Responsible, Innovative, Value-led Educators

ABOUT IIM AMRITSAR

THE HOLY IIM

Indian Institute of Management (IIM) Amritsar is the 15th IIM set up by the Ministry of Human Resource Development with the support of the Government of Punjab. Being located in Amritsar, the land of the Golden Temple and Wagah Border, the Institute benefits from the enriching experience offered by this holy city. The Institute is currently run in the Punjab Institute of Technology Building, 5 km away from the railway station and 10 km from the airport. Its permanent campus under construction is easily accessible from the railway station and airport.

IIM Amritsar, at present, offers a two years full time degree in MBA, MBA-Human Resources, MBA Business Analytics. It also offers a two year degree in Executive MBA in the hybrid mode and also has a Ph.D. program for young researchers.

All the programs have been designed to provide world-class management education to meet the requirements of enterprises across sectors by producing highly insightful management professionals. Owing to its indefatigable allegiance to providing exemplary education, IIM Amritsar has established itself as the vanguard of quality education and learning in a short span of time.

About ATAL Academy

AICTE Training and Learning (ATAL) Academy is established with the vision “To empower faculty to achieve goals of Higher Education such as access, equity, and quality.” AICTE is committed to developing quality technical education in the country by initiating various schemes launched by Govt. of India, Ministry of Human Resource Development. The Council understands that there is a need to train the young generation in the skill sector and having faculty & technicians trained in their respective disciplines. Training is required to increase students' knowledge and skillsets to make them more employable to acquire global competencies.

Objective of the Program

Educational institutions have a fundamental responsibility to shape and nurture the young impressionable minds for the future. All around the world, schools and colleges, which are a part of larger societies, are undergoing tremendous changes. The educational institutions today are reeling under the pressure to match up their pace with the ever-changing demands being thrust upon by the rapid technological changes, agile intergenerational workforce, diverse student population, and greater accountability along with resources constraints. The path ahead looks complex, uncertain and unclear. Educational leaders as pedagogical heads are required to manage the teaching-learning process, establish norms for continuous quality improvement and also create a collaborative learning organization. They also play a vital role in defining the cultural DNA of their school. They have to continually shift their focus from reactive to a more proactive strategic response to the future challenges.

The move towards decentralized self-managed school systems; outcome-based education, authentic assessment patterns, standardized curriculum and student-learning outcomes constantly act as accountability parameters. In this training program the focus will be on the varied issues that the Principals, Deans, Faculty and the Teachers grapple with in the day-to-day functioning of their schools and colleges. By establishing and interpreting the nature and scope of educational change, the program Leading in the Changing Times will make a significant contribution in meeting this challenge.
